Automatic Chain-Stitch Crochet Machine (ESP32, Wi-Fi controlled)

All prices are approximate estimates in Indian Rupees including GST, intended for budgeting. They were not checked against live listings, so confirm price and stock before ordering. The purchase links open a search on the supplier site rather than a single product page, so they keep working if a listing changes. Product photos are shown where supplied; the remaining images are illustrations of the component type. In both cases use the supplier listing to confirm the exact item.

Notes

- Tools not included: soldering iron, multimeter, screwdriver and hex key set, and access to a 3D printer or a print service.
- Servos must run from the separate 5 V buck converter, not from the ESP32 board.
- The A4988 can be replaced with a TMC2209 for quieter operation; wiring for STEP, DIR and EN stays the same.
- An editable version of this list with live formulas is provided as Crochet_Machine_BOM.xlsx.
- Photos show the seller's pack contents, which can differ from the quantity in this BOM (multi-packs, bundled cables or extra parts). Buy the quantity in the Qty column.
- The power adapter photo shows a 12 V 1 A model. Buy a 12 V 3 A adapter as specified; a 1 A supply may not give enough current for the stepper motor and servos.
- The fastener photo shows a hex nut and washer kit only. Also buy M3, M4 and M5 screws. The bearing photo shows LM8UU bearings without the rods.
